

<p>Week 1</p>	<p>Debate: Do We Need Nuclear Power to Decarbonize Our Energy Supply? <i>Monday 14th January, 7.15pm – Harris Lecture Theatre, Oriel College</i> At our first event of the term, we will debate the role of nuclear power in decarbonizing energy production: Can nuclear power play a role in the future’s decarbonized energy system, and does it have to? Join the debate with our expert speakers Nick Eyre (Professor of Energy and Climate Policy, University of Oxford) and Martin Freer (Director, Birmingham Energy Institute)!</p>		<p>Talk by Nigel Topping, CEO of the We Mean Business Coalition <i>Monday 18th February, 2.00pm - Oxford Martin School Lecture Theatre</i> Clearly, the role of business will be key if we are to transition to the zero-carbon economy envisaged in the Paris Agreement. The We Mean Business coalition was instrumental in bringing in the voice of progressive business to the multilateral process and continues to coordinate bold ambition, action and advocacy from global businesses acting on climate change. CEO Nigel Topping will explain how business engaged in the Paris process, the role of business in ratcheting and delivering climate ambition and his thoughts on the future role of business in delivering the transformative change needed.</p>
<p>Week 2</p>	<p>Talk by Kevin Anderson, Deputy Director of the Tyndall Centre for Climate Change Research <i>Thursday 24th January, 7.15pm - Flora Anderson Hall, Somerville College</i> Kevin Anderson is Professor of Energy and Climate Change at the University of Manchester and Deputy Director of the Tyndall Centre for Climate Change Research. He is one of the world’s most outspoken climate scientists, and is an advisor to both the British and the Swedish government on a broad range of issues related to climate change. We are looking forward to his talk, which will be followed by a Q&A.</p>	<p>Week 6</p>	<p>Annual General Meeting and Committee Elections <i>Saturday 23rd February, 5.30pm - Lecture Room 23, Balliol College</i> At our Annual General Meeting, we will look back at the past year and plan ahead for the coming year. Most importantly, a new committee will be elected - every member of the University can vote and is eligible to run in the elections. Make sure to subscribe to our newsletter to receive more information about the elections in due course!</p>
<p>Week 3</p>	<p>Panel: Human Rights & Climate Change <i>Monday 28th January, 7.15pm - Flora Anderson Hall, Somerville College</i> When we think of climate change, we think of the most obvious effects it has on us, biodiversity and the environment. However, what we often don’t consider is how it has the ability to deny some communities their basic human rights. Join this discussion to understand the intersection between human rights and climate change in order to assess what the right calls of actions may be. <i>Speakers to be announced.</i></p>	<p>Week 7</p>	<p>Anthroposphere - The Oxford Climate Review: Spring Launch <i>Monday 25th February, 7.15pm - Sultan Nazrin Shah Centre, Worcester College</i> Join us for the Spring launch of <i>Anthroposphere</i> magazine in Worcester College’s Sultan Nazrin Shah Auditorium! We celebrate the third issue of the only international, student run interdisciplinary magazine on climate change, launched by OCS in 2018. Enjoy a glass of wine on us alongside a guest speaker, a chance to meet the team behind the publication and an opportunity to pick up your own copy of issue three.</p>
<p>Week 4</p>	<p>Climate Action Week <i>Events running throughout Week 4</i> Our first-ever Climate Action Week will explore strategies for responding to climate change on as many fronts as possible, from lifestyle to legislation. Co-organised with the Student Union, Oxford Climate Justice Campaign, the Oxford Hub and Oxford Sustainability, and featuring collaborations with Oxford Migrant Solidarity, Waste Society and more. A week of lunchtime workshops and evening discussions. Events TBA – make sure to follow us on Facebook and subscribe to our newsletter!</p>		<p>Book Talk with Mike Berners-Lee, Author of “There is No Planet B” <i>Wednesday 27th February, 7.00pm – Harris Lecture Theatre, Oriel College</i> Mike Berners-Lee consults, thinks, writes and researches on sustainability and responses to 21st century challenges. “There Is No Planet B: A Handbook for the Make or Break Years” is his third book, plotting a course of climate action that is practical and even enjoyable, filled with astonishing facts and analysis. It’s been called “massively entertaining [and] important” by Bill McKibben and described as “a beacon of common sense, clarity and – crucially – hope” by Caroline Lucas MP. Join us one day before the book’s official launch for an exclusive book talk!</p>
<p>Week 5</p>	<p>Demystifying Climate Modelling <i>Monday 11th February, 7.15pm - Venue to be announced</i> Although Meteorological and Climate Modelling is a topic obviously crucial to the Climate Change debate, it is often challenging for non-atmospheric scientists to appreciate in any detail. Join our expert speakers, including Tim Palmer (Co-director, Oxford Martin Programme on Modelling and Predicting Climate), as we delve into how climate modelling actually works, and how climate models are then used to inform policies and decision-making.</p>	<p>Week 8</p>	<p>Young People & Climate Action <i>Monday 4th March, 7.15pm – Venue to be announced</i> At our committee’s last event we will look at the role that young people have to play in the climate movement. Representatives from the 2050 Climate Group, which aims to empower young people to take action on climate change, and the UK Youth Climate Coalition (UKYCC), which focuses on mobilizing young people, will be joining us to share the work they do and will discuss how young people can get involved, as well as the role they have to play in facilitating change.</p>
